11: Do you have any other comments about the proposals?

Below are a selection of responses:

- The flooding is especially bad
- More trees and litter bins are needed
- Car park renovations and potentially even expansion. The bay lines need repainting and levelling of the ground, and more drains as the car park is very prone to flooding
- More outdoor playing activities for young boys for example add tennis courts.
- New older children play area would be really helpful full as current size is too small for the increasing local population.
- A planter with seasonal planting displays near the gym area would be preferable to cycle parking

Conclusion:

The feedback from the respondents about the proposals is very positive and informative. It is encouraging that people are excited to see improvements being made to Reddings Lane Park.

We shall endeavour to take this feedback into account in our approach to the detailed design and deliver a scheme that reflects the needs of the people within the budget available.
