

The Ackers Park Landscape Improvements

Public Consultation Results - March 2026

We have conducted both an online consultation on our platform “Be Heard” running from 5th February until 26th February 2026 to gather the residents’ opinions on the landscape improvements proposed for The Ackers Park. Collectively, we have received 43 responses. From the consultation, we have full support, with 100% of respondents agreeing with the proposed works. Please read below for more information and statistics from the consultation.

Design proposals

We have asked the respondents if overall they support all of the design proposals at The Ackers Park. 100% of the respondents support the proposed landscape improvements.

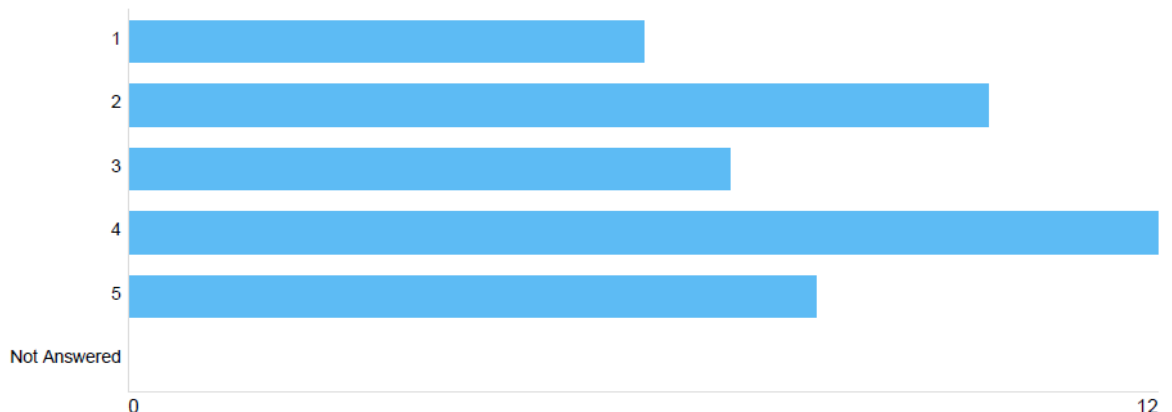

Calisthenics Equipment

We have asked the respondents to rate which calisthenics equipment which is the most favourable to them out of the equipment proposed from 1 (most favourable) to 5 (least favourable).

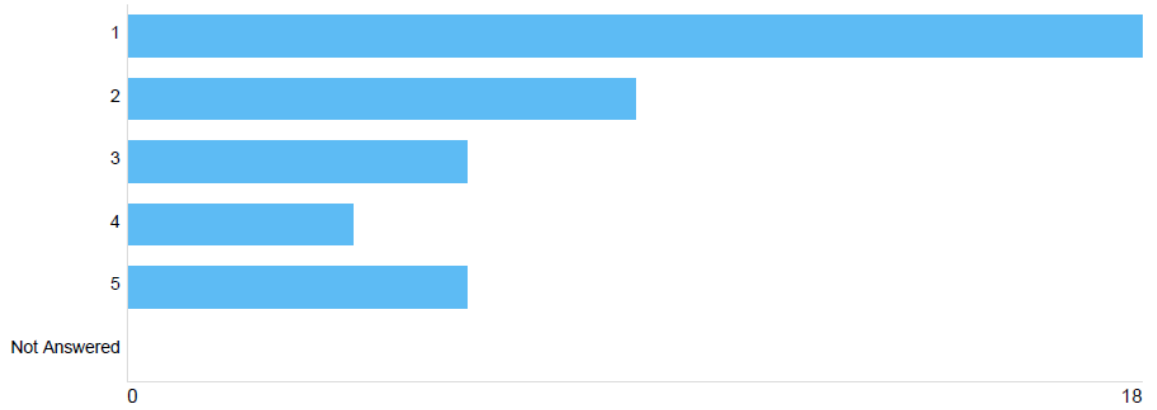

‘Calisthenics Rig’ scored the highest, with 18 respondents voting it as their ‘most favourable’ while all of the other choices were next in line with similar quantity of votes. Meanwhile, high paralette bars received the fewest amount of votes for ‘most favourable’ with only 3.

Proposed landscape improvements

We have asked the respondents to rate which areas of improvement are most important to them. Play equipment ranked in the top overall, followed by outdoor gym equipment and thirdly by calisthenics equipment.

If the budget doesn't allow for all of the proposed works, what would be most important to you? Please rate from most important (1) to least important (6)

Table of "Please rate in order" in rank order

Additional comments

Out of all of the respondents, 63% had additional comments to add. Most of the feedback we have received in the additional comments was very positive, respondents expressing their excitement for improvements in the park. Some of the most common comments included the need to lighting and volleyball pitches. Other comments included more planting such as flower beds, something to reflect the culture of the community, a pump track: space for biking / skateboarding, sports facilities such as a running track, sports pitches, calisthenics equipment, seating areas, bins and repairing pot holes. Respondents also highlighted there are a lot of toddlers and young kids, as well as older children who tend to get bored, and asked we cater the play areas to both of those age groups, so there is something for everyone.

Conclusion

To conclude, overall there is strong support for the proposed improvements – many residents emphasize how urgently they are needed. Respondents are excited to see change and are looking forward to enjoy the park with their families.

Thank you to everyone who took their time to contribute to the consultation. We will be taking your views into consideration in the next stages.
