

Employment and Services

The project will bring hundreds of jobs, during the construction of the new residential village, the later conversion project, and the wider improvements to the Perry Barr area.

There will also be 1000s of hours created for apprenticeships and training.

There will be key opportunities to engage Small Medium Enterprises (SMEs), the 3rd sector and Employ and Buy Local first in the project.

The promoters will work with the community, stakeholder groups, local businesses, schools, colleges and universities to maximise engagement and participation.

The Council, as developer, will drive excellence in ethical procurement and look to create a highly sustainable environment for future users.
